# Rampaging research

## Within Human Behavior and the Principle of Least Effort:

- ▶ City sizes
- ▶ # retail stores in cities
- ▶ # services (barber shops, beauty parlors, cleaning, ...)
- ▶ # people in occupations
- ▶ # one-way trips in cars and trucks vs. distance
- ▶ # new items by dateline
- ▶ weight moved between cities by rail
- ▶ # telephone messages between cities
- ▶ # people moving vs. distance
- ▶ # marriages vs. distance

- ▶ Observed general dependency of 'interactions' between cities  $A$  and  $B$  on  $P_A P_B / D_{AB}$  where  $P_A$  and  $P_B$  are population size and  $D_{AB}$  is distance between  $A$  and  $B$ .

Empirics

References

# Zipf's basic idea:

## Forces of Unification and Diversification:

- ▶ Easiest for the speaker to use just one word.
- ▶ Zipf uses the analogy of tools: one tool for all tasks.
- ▶ Optimal for listener if all pieces of information correspond to different words (or morphemes).
- ▶ Analogy: a specialized tool for every task.
- ▶ Zipf thereby argues for a tension that should lead to an uneven distribution of word usage.
- ▶ No formal theory beyond this... (more later <sup>[1]</sup>)

## Comment #60 in Math and the City by Strogatz, NYT:

60. May 20, 2009

9:26 am

[Link](#)

George Kingsley Zipf was my teacher at Harvard...He had given a class project where we were to see if Chemical Companies when ranked by the number of different chemicals they produced, followed his Law of Least Effort. I missed turning in my assignment due to the accidental death of my father....When I returned from the funeral I was given a message to call Dr. Zipf immediately. I did and when I explained why I was late turning in the data. He said, "Well, your father's gone and I (Zipf) have no pipeline to God. I expect the data will be on my desk tomorrow morning!" .....My mother, sister and extended family spread huge books of trade magazines on the kitchen and dining room tables and furiously went to work....We worked until late in the night and finished the project....I drove to Harvard the next morning and angrily gave the hundreds of 'three by five cards' to Zipf. All he said was, "Thank you." Years later, I wondered whether his 'meanness' had really been his way of helping me and my family to take our minds off our grief that day and concentrate on finishing my assignment. In my youth I thought not, but now as I approach 80, I like to think his seemingly hurtful attitude was really an act of kindness,,,,,

— *Jim Terry*

TABLE 2-2
