### "This is truly the last time, believe me"

### The Washington Post

From the moment the Pacebook founder entered the public eye in 2003 for creating a Harvard student hot-or-net rating site, he's been apologizing. So we collected this abbreviated history of his public max clapas.

It reads like a record on repeat. Znokorberg, who made "move fast and break things" his slogan, says sorry for being naive, and then premises subhines such as privacy "controls," "transparency" and better policy "minorement." And then he premises it again the next time. You can track his <u>version tiorarys</u> and <u>premises its bars</u> in the timeline below.

All the while, Facebook's access to our personal data increases and little charges about the very Zackerberg handles it. So as Zackerberg prepares to apologize for the first time in front of Congress, the question that lingers ic: What will be different this time?

Robert Godwin S

"Our hearts go out to the family and friends of Robert Godwin Sr., and we have a lot of work – and we will keep doing all we can to prevent tragedies like this from happening."

September 2017 While revealing a nine-step plan to step nations from using Facebook to interfere in one another's electrons, noting that the amount of "problematic content" found so far is "relatively small."

" I care deeply about the democratic process and protecting its integrity. ... It is a new challenge for internet communities to deal with

WaPo article

After launching Beacon, which opted in everyone to sharing with advertisers what they were doing in outside websites and apps.

We simply did a bad job with this release and I apologize for it. ... People need to be able to explicitly choose what they share.

February 2009 After unveiling new terms of service that angered users.

"Over the past couple of days, we received a lot of questions and comments... Based on this feedback, we have decided to return to our previous terms of use while we resolve the issues."

March 2018 After details emerged about Cambridge Analytica taking user data.

We have a responsibility to protect your data, and if we can't then we don't deserve to serve you.....We will learn from this experience to secure our platform further and make our community safer for everyone going forwart." Correlation for deciving consumers about privacy.

been committed to being transparent about the information you have stored with us — and we have led the internet in building tools to give people the ability to see and control what they share."

July 2014 After an academic paper exposed that Facebook conducted psychological tests on nearly 700,000 users without their knowledge. Water to Facebook Coo Stend Sandown

"It was my mistake, and I'm sorry. ... There's more we can do here to limit the information developers can access and put more safeguards in place to prevent abuse."

### Related stor

Parchosk: Most users may have had publics data 'scragod' Parchosk COO Sheryf Sandherg on data leak: 'I am really scray, we are late.' As Parchosk confronts data misuos, foreign governments might force real change What If we public Parchosk — instead of letting it upy on us for free?

#### Understanding the Sociotechnocene—Stories:

- Toward a Science of Stories.
- Claim: Homo narrativus C—we run on stories.
  - "What's the John Dory?"
  - "They've lost the plot/thread"
  - Narrative hierarchies and scalability of stories .
  - Research: Real-time and offline
    extraction of metaphors, frames,
    plots, narratives, conspiracy theories,
    and stories from large-scale text.
    Research: The taxonomy of human
    stories.
  - To be built: Storyscopes—improvable, online, interactive instruments.

Percent Wealth Owned

**Fig. 2.** The actual United States wealth distribution plotted against the estimated and ideal distributions across all respondents. Because of their small percentage share of total wealth, both the "4th 20%" value (0.2%) and the "Bottom 20%" value (0.1%) are not visible in the "Actual" distribution.

"Building a better America—One wealth quintile at a time" Norton and Ariely, 2011.<sup>[15]</sup>

#### Wealth distribution in the United States: <sup>[15]</sup>

Top 20% = 2nd 20% = Middle 20% = 4th 20% = Bottom 20%

Percent Wealth Owned

Fig. 3. The actual United States wealth distribution plotted against the estimated and ideal distributions of respondents of different income levels, political affiliations, and genders. Because of their small percentage share of total wealth, both the "4th 20%" value (0.2%) and the "Bottom 20%" value (0.1%) are not visible in the "Actual" distribution.

#### Aside: The 1% framing may be effective but makes no sense.
