## Pantheon : The most memorable people of history

 HPI: Historical Popularity Index.

 Concept: Measure current importance of a figure based on a composition score derived from Wikipedia quantities.

### What is HPI?

HPI stands for Historical Popularity Index. It is a simple an ad-hoc metric that aggregates information on a biography's online popularity. HPI is based on the idea that fame needs to break multiple barriers, like those of time and language. HPI aggregates information on the age and attention received by biographies in multiple language editions of Wikipedia to provide a summary statistic of their global popularity.

HPI is currently made of five components: the "age" of a biography's character (e.g. Jesus is more than 2,000 years old), number of Wikipedia language editions in which the biography has a presence (L), the concentration of the pageviews received by a biography across languages (L<sup>\*</sup>), the stability of pageviews over time (CV), and the number of non-English pageviews received by that biography. We find that combining these metrics provides a more sensible ranking than using these metrics alone. **To validate HPI, we previously showed that it correlates better with accomplishments than single metrics**, when we focus on activities where individual accomplishments are measurable (e.g. Chess, Olympic Swimming, Tennis, Formula One).

While being an ad-hoc metric, HPI also attempts to correct for the internet's English bias. By using non-English page views, and giving a premium to biographies that have a presence in multiple languages, and whose pageviews are not concentrated in only a few of them, HPI tries to move away from a ranking dominated by English pageviews.

### Where can I submit a suggestion?

You can use the following form to suggest correction to Pantheon's data. Pantheon's atomic unit of data is the biography, so all corrections should be communicated as corrections to a biography (everything else is an aggregate).

# The all timers from the collective view of 2024

# (Sir Terry) Pratchett's Narrativium

“The most common element on the disc, although not included in the list of the standard five: earth, fire, air, water and surprise. It ensures that everything runs properly as a story.”

“A little narrativium goes a long way: the simpler the story, the better you understand it. Storytelling is the opposite of reductionism: 26 letters and some rules of grammar are no story at all.”

“Heroes only win when outnumbered, and things which have a one-in-a-million chance of succeeding often do so.”

## Game of Thrones, S8E06: The Iron Throne

“What unites people? Armies? Gold? Flags?<sup>1</sup> Stories.  
There's nothing in the world more powerful than a good story.  
Nothing can stop it.  
No enemy can defeat it.”

---

<sup>1</sup>Character is the shortcut to story

Stories are the essence of ... oh no, no, no ...

Except for writers who destroy their own stories.

Also audiences. [↗](#)

Basic word of mouth.

And critics. [↗](#)

And other, better stories [↗](#).

Character assassination works too.

## Game of Thrones **IMDb**

Great Good Regular Bad Garbage

# Why adjacent narratives exist and untrue stories flourish:

1/4. A real story is never recorded and retold completely

- Impossible to record every detail.
- Recording entails compression to scale of medium (narrative hierarchy).
- Story logic will be favored, and seemingly irrelevant aspects discarded.

# Why adjacent narratives exist and untrue stories flourish:

2/4. The infinitude of adjacent stories will afford “better” stories

- Better = More engaging, more motivating to spread, more durable under spreading.
- Better stories exist for truthful recorders and retellers (journalists).

# Why adjacent narratives exist and untrue stories flourish:

3/4. The infinitude of adjacent stories means “better” stories exist for those who would disinform

- Adjacent stories may be truth-limited and/or falsehood-bearing.
- There may exist adjacent stories that conform to a world view/ideology.
- Even the seemingly non-adjacent must have some plausibility (Pizzagate).

# Why adjacent narratives exist and untrue stories flourish:

## 4/4. Character is the shortcut to story

-  The barely implausible can be believed if the character can make it so.
-  A believe-to-be evil character can do anything.
-  Iterate between character and story to make the character fixed.

## Poe's law

 In short: There is no parody too extreme that, when taken out of context, someone somewhere won't take to be sincere.

 Minor comment by Nathan Poe on christianforums.com:

*"Without a winking smiley or other blatant display of humor, it is utterly impossible to parody a Creationist in such a way that someone won't mistake for the genuine article."*

 Usual win for Stigler's Law of Eponymy .

 Post by Jerry Schwarz on Usenet, 1983:

*'Avoid sarcasm and facetious remarks.*

*Without the voice inflection and body language of personal communication these are easily misinterpreted. A sideways smile, :-), has become widely accepted on the net as an indication that "I'm only kidding." If you submit a satiric item without this symbol, no matter how obvious the satire is to you, do not be surprised if people take it seriously.'*

 Related: "Nobody ever went broke underestimating the intelligence of the American people" — H. L. Mencken (but not exactly .

## From the end of the interview:

NICOLAS HENIN: No, it was just like in a movie. And, by the way, even the people going to Syria, joining ISIS in Syria to fight, even these people see himself as movie characters. They play their own movie. This is why I think that the most powerful way to fight ISIS are not bombs. **It is to kill the narrative.** We have to write another movie. We have to build other heroes. And this is why I believe that the French are making big mistakes in the ways they, they fight ISIS.

We created, for instance, accounts on the social media named “Stop Jihadism,” and this is [BLEEP], like they did not understand anything. And I did understand why we are so bad. **It's just because in France we don't know how to write TV series properly.**

[BROOKE LAUGHS]

Just because we have no imagination, we cannot just tell beautiful stories, create beautiful characters, beautiful heroes.

And this is what we have to do because in our world, in our societies what do people want? They want to become heroes. They want to be famous. They want to be, to be recognized.

## Stories make us do all kinds of things:

The Comet Ping Pong Gunman Answers Our Reporter's Questions: [↗](#)

🔗 “According to court documents, Mr. Welch said he had come armed to help rescue the children.”

🔗 “The intel on this wasn’t 100 percent,” he said.’

🔗 He said he did not believe in conspiracy theories, but then added that the Sept. 11, 2001, attacks needed to be re-examined. He has listened to Alex Jones, whose radio show traffics in conspiracy theories and who once said that Mrs. Clinton “has personally murdered and chopped up” children. “He’s a bit eccentric,” Mr. Welch said. “He touches on some issues that are viable but goes off the deep end on some things.””

## The American Dream = Rags to Riches

- 🧱 The story that anyone can become King or Queen.
- 🧱 Story of individual, not the collective.
- 🧱 But we know about fame and success:  
The presence of outsized fame in a social system means social imitation is a driver of value.
- 🧱 Stories of societies can only hold if they have been and remain believable.
- 🧱 “Entertaining beliefs in economic mobility”: Effort to understand if rags to riches stories in popular culture affect people’s lives. <sup>[15]</sup>

## The story of Jermaine and Bret: Rags to Rags

Full scene here  .

If not Trump, what? [↗](#), David Brooks, New York Times,  
2016-04-29:

“We’ll probably need a new national story. Up until now, America’s story has been some version of the rags-to-riches story, the lone individual who rises from the bottom through pluck and work. But that story isn’t working for people anymore, especially for people who think the system is rigged.”

“I don’t know what the new national story will be, but maybe it will be less individualistic and more redemptive. Maybe it will be a story about communities that heal those who suffer from addiction, broken homes, trauma, prison and loss, a story of those who triumph over the isolation, social instability and dislocation so common today.”

## Claim: Stories must have “real” substance to endure over generations<sup>3</sup>

Enormous disasters: Fabrications of real experiences.

- Plain old making stuff up: A million little pieces ... Oprah will get you.
- Wikipedia's has a list of famous fake memoirs .
- Expansive plagiarism: How Opal Mehta Got Kissed, Got Wild, and Got a Life .  
#kudos
- Self-plagiarism and more standard badness: Jonah Lehrer .  
Amazingly: Made up Bob Dylan quotes.
- Lance Armstrong. Also got to meet Oprah.

Enormous power: Fiction that speaks to real experiences.

<sup>3</sup>Reality is being tested harshly

## The story trap ↗ by Philip Ball, 2015-11-12

“We use neat stories to explain everything from sports matches to symphonies. Is it time to leave the nursery of the mind?”

“...we might wonder if the ultimate intelligibility of the universe will be determined not so much by the capacity of our minds to formulate the appropriate concepts and equations, but by whether we can find a meaningful story to tell about it.”

## The “I wonder who wrote this?” Great Man Theory:

“The Power of Myth” [a](#) [↗](#)  
by Campbell and Moyers (1991). [6]

“The Hero with a Thousand Faces” [a](#) [↗](#)  
by Joseph Campbell (2008). [5]

Highly influential but it's a trap! [↗](#)

## How to write a screenplay:

“Save the Cat!” [a](#) [↗](#)  
by Blake Snyder (2005). <sup>[21]</sup>

9 acts.

Someone important to the main characters gets toasted in the second act, blah, blah.

Believes irony is key.

Logline = one or two sentence summary.

Logline fails to be a summary of logline.

## Seven “good” stories?:

“The Seven Basic Plots: Why We Tell Stories” [a](#) [↗](#)  
by Christopher Booker (2005). <sup>[3]</sup>

-  Seven Gateways to the Underworld (?)
-  Overcoming the Monster ×2 and the Thrilling escape from Death (plot).
-  Rags to Riches (plot).
-  The Quest (plot).
-  Voyage and Return (plot).
-  Comedy ×2 (plot but really structure).
-  Tragedy ×3 (plot).
-  Rebirth (plot).
-  The Dark Power: From Shadow into Light (master structure).

# Rules of Story:

	Gun	Cat	Razor	Law
Checkov's	If a gun is introduced in the first act, it must be fired by the third.	If a box is introduced in the first act, a cat must sit in it by the third	The simplest way to fire a gun is to pull the trigger	Every gun in a play will be fired
Schrodinger's	You can't know if a gun is loaded, or not, until the trigger is pulled	An unopened box may contain a dead cat, or an alive one, and you won't know until you open it	An unopened box may contain the solution to your problems	You can't know that things will go wrong, until they do
Occam's	The simplest way to kill off a character is to shoot them	If you hear a strange noise at night, it's probably a cat	The simplest explanation is probably the correct one	Everything that can be explained, will be explained
Murphy's	Any gun that can go off, will go off	Any box that can contain a cat, will contain a cat	Anything that can be simple, will be simple	Anything that can go wrong, will go wrong

# “The phylogeny of Little Red Riding Hood” ↗

Jamshid J. Tehrani,

PLoS ONE, **8**, e78871, 2013. [22]

**Figure 2. Majority-rules consensus of the most parsimonious trees returned by the cladistic analysis of the tales.** Major groupings are labelled by region or ATU international type and indicated by the coloured nodes. Sub-types are indicated in the taxa labels (RH = Little Red Riding Hood; GM = Story of Grandmother; Catt = Cattenille; WK = The Wolf and the Kids; TG = Tiger Grandmother). Variants by particular authors, or from countries/ethnic groups that are discussed in the text have individual labels. Numbers beside the edges represent the level of support for individual clades returned by the bootstrap analysis.

# The taxonomy of stories:

## Fundamental arcs:

-  Kill the Monster.
-  Rags to Riches (and Riches to Rags—The Metamorphosis ).
-  Journey/Odyssey: Search for a salvation, a “Holy Grail”.
-  Romance.
-  Narratives in Left Nullspace: Again, All Stories of The Many.

## What about comedies?

-  Comedies are not in themselves a story, but a way of telling stories.

# Stories are algorithms for life:

## Homo narrativus:

- Provide dynamic paths and trajectories.
- If this, then that.
- Convey and reinforce how to behave, how not to behave.
- Full ecology of stories =  
Competing, self-defending operating system for people's minds.

## Proverbs as algorithms (hero: Wolfgang Mieder):

- “Pride cometh before the fall.”
- “A stitch in time saves nine.”
- “Look before you leap.”
- “Anti-aphorism: The one who hesitates is lost.”
- Understanding randomness: “Shit happens”

## Hatchings, Matchings, and Dispatchings

30 Rock  
S4E19: Argus  
April 29, 2010

I HAVE AN ANNOUNCEMENT TO MAKE.

# The boiled-down essence of stories:

## The three fundamental events of (non-clone) life:

-  Hatchings, Matchings, and Dispatchings.
-  Stories encode survival algorithms.
-  Survival algorithms for individuals and groups.
-  Dynamic paths: the true, the possible, the unlikely.
-  The unifying theme of existence is existence.

## Kurt Vonnegut on the shapes of stories

Source: Kurt Vonnegut on the Shapes of Stories 

Longer piece  with bonus stories (Metamorphosis and Hamlet).

# Harry Potter and the Deathly Hallows

by J.K. Rowling

“The emotional arcs of stories are dominated by six basic shapes” [↗](#)

Reagan, Mitchell, Danforth, Dodds, and Dodds.

EPJ Data Science, 5, 31, 2016. <sup>[19]</sup>

## Harry Potter and the Trove of Plot Devices

## Stories matter:

Used by Reagan and Bush in 1980.

Template used by many others including Bill Clinton.

Emotional arcs are not plots. Temporal character interaction networks are closer but still miss events, environments, interaction types:

THESE CHARTS SHOW MOVIE CHARACTER INTERACTIONS.  
THE HORIZONTAL AXIS IS TIME. THE VERTICAL GROUPING OF THE LINES INDICATES WHICH CHARACTERS ARE TOGETHER AT A GIVEN TIME.

<sup>4</sup>Okay, poems are everything

## “George Green and physics”

Freeman Dyson,  
Physics World, **6**, 33, 1993. <sup>[10]</sup>

 “... scientific revolutions are more often driven by new tools than by new concepts.

 Thomas Kuhn in his famous book, *The Structure of Scientific Revolutions*, talked almost exclusively about concepts and hardly at all about tools. His idea of a scientific revolution is based on a single example, the revolution in the theoretical physics that occurred in the 1920s with the advent of quantum mechanics.

 This was a prime example of a concept-driven revolution. Kuhn’s book was so brilliantly written that it became an instant classic. It misled a whole generation of students and historians of science into believing that all scientific revolutions are concept-driven.”

“George Green and physics” 

Freeman Dyson,  
Physics World, **6**, 33, 1993. <sup>[10]</sup>

“The concept-driven revolutions are the ones that attract the most attention and have the greatest impact on the public awareness of science, but in fact they are comparatively rare.

In the last five hundred years we have had six major concept-driven revolutions, associated with the names of Copernicus, Newton, Darwin, Maxwell, Einstein and Freud, besides the quantum-mechanical revolution that Kuhn took as his model.

During the same period there have been about 20 tool-driven revolutions, not so impressive to the general public but of equal importance to the progress of science.”

## “George Green and physics”

Freeman Dyson,  
Physics World, 6, 33, 1993. <sup>[10]</sup>

 “I will not attempt to make a complete list of tool-driven revolutions. Two prime examples are the Galilean revolution resulting from the use of the telescope in astronomy, and the Crick-Watson revolution resulting from the use of X-ray diffraction to determine the structure of big molecules in biology.

 The effect of a concept-driven revolution is to explain old things in new ways.

 The effect of a tool-driven revolution is to discover new things that have to be explained.”
