From the Preface—

Nearly twenty-five years ago it occurred to me that we might gain considerable insight into the mainsprings of human behavior if we viewed it purely as a natural phenomenon like everything else in the universe, ...

And—

... the expressed purpose of this book is to establish [The Principle of Least Effort](#) as the primary principle that governs our entire individual and collective behavior ...

The Principle of Least Effort:

Zipf's framing (p. 1):

"... a person in solving his immediate problems will view these against the background of his probable future problems *as estimated by himself.*"

"[he will strive to] minimize the *probable average rate of his work-expenditure...*"

Rampaging research

Within Human Behavior and the Principle of Least Effort:

-  City sizes
-  # retail stores in cities
-  # services (barber shops, beauty parlors, cleaning, ...)
-  # people in occupations
-  # one-way trips in cars and trucks vs. distance
-  # new items by dateline
-  weight moved between cities by rail
-  # telephone messages between cities
-  # people moving vs. distance
-  # marriages vs. distance

Zipf's basic idea:

Forces of Unification and Diversification:

-  Easiest for the speaker to use just one word.
-  Zipf uses the analogy of tools: **one tool for all tasks**.
-  Optimal for listener if all pieces of information correspond to different words (or morphemes).

Zipf's basic idea:

Forces of Unification and Diversification:

-  Easiest for the speaker to use just one word.
-  Zipf uses the analogy of tools: **one tool for all tasks**.
-  Optimal for listener if all pieces of information correspond to different words (or morphemes).
-  Analogy: a specialized tool for every task.

Zipf's basic idea:

Forces of Unification and Diversification:

-  Easiest for the speaker to use just one word.
 -  **Encoding is simple** but **decoding is hard**
-  Zipf uses the analogy of tools: **one tool for all tasks**.
-  Optimal for listener if all pieces of information correspond to different words (or morphemes).
-  Analogy: a specialized tool for every task.

Zipf's basic idea:

Forces of Unification and Diversification:

-  Easiest for the speaker to use just one word.

Comment #60 in Math and the City by Strogatz, NYT:

60. May 20, 2009

9:26 am

[Link](#)

George Kingsley Zipf was my teacher at Harvard...He had given a class project where we were to see if Chemical Companies when ranked by the number of different chemicals they produced, followed his Law of Least Effort. I missed turning in my assignment due to the accidental death of my father....When I returned from the funeral I was given a message to call Dr. Zipf immediately. I did and when I explained why I was late turning in the data. He said, "Well, your father's gone and I (Zipf) have no pipeline to God. I expect the data will be on my desk tomorrow morning!"My mother, sister and extended family spread huge books of trade magazines on the kitchen and dining room tables and furiously went to work....We worked until late in the night and finished the project....I drove to Harvard the next morning and angrily gave the hundreds of 'three by five cards' to Zipf. All he said was, "Thank you." Years later, I wondered whether his 'meanness' had really been his way of helping me and my family to take our minds off our grief that day and concentrate on finishing my assignment. In my youth I thought not, but now as I approach 80, I like to think his seemingly hurtful attitude was really an act of kindness,,,,,
