The science of stories:

Why?

Stories matter: Homo narrativus

Stories are fundamental to how people comprehend, explain, and potentially shape their lives, the lives of others, and the world.

Stories are about survival: Power and danger.

Zed takes the chair, sits it in front of the two prisoners, then lowers into it. Maynard hands The Gimp's leash to Zed, then backs away.

MAYNARD
(to The Gimp)
Down!

The Gimp gets on its knees.

Maynard hangs back while Zed appraises the two men.

MAYNARD
Who's first?

ZED
I ain't fer sure yet.

Then with his little finger, Zed does a silent "Eenie, meeny, miney, moe..." just his mouth mouthing the words and his finger going back and forth between the two.

Butch and Marsellus are terrified.

Maynard looks back and forth at the victims.

The Gimp's eyes go from one to the other inside the mask.

“Heroes, villains and fools, as agents of social control” ↗

Orrin E. Klapp,

American Sociological Review, **19**, 56–62, 1954. [?]

SOCIAL types comprise a relatively unappreciated field of popular culture. Though certain ones have been intensively studied from special points of view,¹ and the role of stereotypes has been long recognized, there has been little effort to catalog, classify, or even adequately consider the vast number of highly significant types to be found in common speech, jokes, comics, popular fiction, folklore and the like. These conceptions, appearing wherever the popular mind finds expression, are truly collective in nature rather than the property of individual authors, “coins” of thought as Sumner phrased it, serving to express group judgments, facilitate consensus, and define roles. This article is concerned with three especially significant generic figures, the hero, villain and fool, and aims to state a theory of their normative nature, role as

sanctions, and mutual contribution to consensus and social control, a relationship which has been only casually considered in sociological literature.

One who long considers these types can hardly fail to feel that their role goes beyond the theatre, that they have a part to play in institutions, movements, political regimes, historical periods and everyday life. When a person is called a hero, villain or fool, this has important implications for his status, influence and the kind of treatment he will receive. An effort is here made to bring them into theoretical relationship as norms representing certain kinds of deviance from average or conventional conduct, carrying appropriate punishments or rewards, and calling for certain modes of collective action. The present article is intended as a suggestive and exploratory statement rather than as a report of finished research.

One may begin with the observation that epithets are sanctions indicating social approval or disapproval, and that many of these, especially the strongest, can be rather readily classified into three generic categories. For instance, a daredevil might be called a hare-brained fool, a criminal endangering the lives of others, or a fearless superman. Some indication of the categories of epithet likely to be applied to extreme deviants is perhaps given by the following lists:

Hero

underdog
champ
big shot
smart operator
Robin Hood
father-of-his-country
protector
emancipator
he-man
race hero
Uncle Sam
Lone Ranger
Superman

Villain

bully
liar
cheat
two-time
bad nigger
racketeer
Red
grafter
dictator
Bluebeard
Fu Manchu
Simon Legree

Fool

crackpot
fanatic
simpleton
sissy
cheapskate
blowhard
butterfingers
sap
yes-man
sucker
Mutt
Happy Hooligan
Sad Sack

¹ For instance, C. Wright Mills, *White Collar*

Statistical "Which Character" Personality Quiz

This is an interactive personality quiz that will match you to fictional characters on similarity of description.

Background

When the creator of this website would tell people that he published personality quizzes, people would usually ask him if he meant that he worked at BuzzFeed on their "Which Character" personality quizzes. And he would have to explain that he did not and had never been that style of test. These quizzes are very fun, as evidenced by their extreme popularity. Meaningful, two people who get the same result on a typical example of these tests much more in common than two randomly paired individuals. So for the longest time one character match personality quiz, but I guess it was inevitable because here is a more scientific, but still silly, "Which Character Are You?" test.

This test was created by getting more than 3 million volunteers to describe themselves on different adjective based scales. This created a database of descriptive ratings are compared against these profiles and the closest match is found. This quiz works and was developed can be found [here](#). There is also a version of self-report, and a [version for couples](#).

Test Instructions

The test is made of pairs of adjectives with a slider between them. For each pair, drag the slider to where you fall on the spectrum between them. This test is self-select how many questions you want to do using the version option. The media recommended version is 185 seconds (~3 minutes).

Participation

This interactive program is provided for entertainment and informational psychological advice or a screening tool of any kind and comes without any particular purpose.

At the end of the survey you will be asked for consent to include your responses. Your agree your responses may be used and shared per [the website privacy policy](#).

Main data set:

 $N_{\text{chars}} = 2000$ characters

 $N_{\text{traits}} = 464$ traits (as semantic differentials)

 $N_{\text{stories}} = 341$ stories of Western literature, film, television

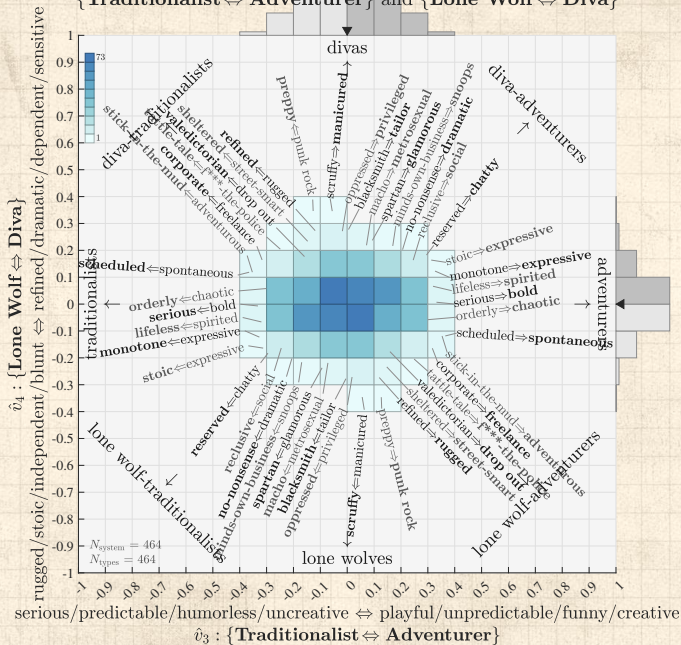

Analysis covers three fixed data sets from an expanding study:

- $N_{\text{chars}}/N_{\text{traits}}/N_{\text{stories}} = 800/235/90$
- $N_{\text{chars}}/N_{\text{traits}}/N_{\text{stories}} = 1600/365/241$
- $N_{\text{chars}}/N_{\text{traits}}/N_{\text{stories}} = 2000/464/341$

Temporary page!

\LaTeX was unable to guess the total number of pages correctly. As there was some unprocessed data that should have been added to the final page this extra page has been added to receive it.

If you rerun the document (without altering it) this surplus page will go away, because \LaTeX now knows how many pages to expect for this document.
