The famous are storytellers—United States:

For people born 1900–

http://pantheon.media.mit.edu/treemap/country_exports/US/all/1950/2010/H15/pantheon

It's all about algorithms (stories):

“On the Origin of Stories: Evolution, Cognition, and Fiction” [a ↗](#)
by Brian Boyd (2010). ^[4]

“The Storytelling Animal: How Stories Make Us Human” 
by Jonathan Gottschall (2013).^[12]

Stories are the essence of ... oh no, no, no ...

Series Heat for GoT

Storytellers win:

For people born 1950–

http://pantheon.media.mit.edu/treemap/country_exports/US/all/1950/2010/H15/pantheon

(Sir Terry) Pratchett's Narrativium .

- “The most common element on the disc, although not included in the list of the standard five: earth, fire, air, water and surprise. It ensures that everything runs properly as a story.”
- “A little narrativium goes a long way: the simpler the story, the better you understand it. Storytelling is the opposite of reductionism: 26 letters and some rules of grammar are no story at all.”

- “Heroes only win when outnumbered, and things which have a one-in-a-million chance of succeeding often do so.”

Simple Definitions:

- 📖 Story🔗: a laying out of a temporal sequence of events.
- 📖 “Time is a great storyteller” (Irish proverb)
- 📖 Events may be any balance of real and imagined.
- 📖 Narrative $\equiv$ Story.
- 📖 Plot🔗: Essential sequence of a story’s elements.²

- Plot = Algorithm

Emotional Arcs
Moving ahead
References

Why adjacent narratives exist and untrue stories flourish:

- 1/4. A real story from real reality is never recorded and retold completely
 - Impossible to record every detail.
 - Recording entails compression to scale of medium (narrative hierarchy).
 - Story logic will be favored, and seemingly irrelevant aspects discarded.

The PoCSverse

Poe's law

- In short: There is no parody too extreme that, when taken out of context, someone somewhere won't take to be sincere.
- Minor comment by Nathan Poe on christianforums.com:
"Without a winking smiley or other blatant display of humor, it is utterly impossible to parody a Creationist in such a way that someone won't mistake for the genuine article."
- Usual win for Stigler's Law of Eponymy.
- Post by Jerry Schwarz on Usenet, 1983:
'Avoid sarcasm and facetious remarks. Without the voice inflection and body language of personal communication these are easily misinterpreted. A sideways smile, :-), has become widely accepted on the net as an indication that "I'm only kidding." If you submit a satiric item without this symbol, no matter how obvious the satire is to you, do not be surprised if people take it seriously.'
- Related: "Nobody ever went broke underestimating the intelligence of the American people" — H. L. Mencken (but not exactly).

Nicholas Hénin, French Journalist, held captive for 10 months

From the end of the interview:

NICOLAS HENIN: No, it was just like in a movie. And, by the way, even the people going to Syria, joining ISIS in Syria to fight, even these people see himself as movie characters. They play their own movie. This is why I think that the most powerful way to fight ISIS are not bombs. It is to kill the narrative. We have to write another movie. We have to build other heroes. And this is why I believe that the French are making big mistakes in the ways they, they fight ISIS.

We created, for instance, accounts on the social media named “Stop Jihadism,” and this is [BLEEP], like they did not understand anything. And I did understand why we are so bad. It’s just because in France we don’t know how to write TV series properly.

[BROOKE LAUGHS]

Just because we have no imagination, we cannot just tell beautiful stories, create beautiful characters, beautiful heroes.

And this is what we have to do because in our world, in our societies what do people want? They want to become heroes. They want to be famous. They want to be, to be recognized.

Massive informational misdirection as a cognitive denial of story:

“How the Chinese government fabricates social media posts for strategic distraction, not engaged argument”
King, Pan, and Roberts,
American Political Science Review, , ,
Forthcoming.^[15]

- Make the truth a needle in a haystack
- Trump’s Reality Distortion Field, <http://www.onthemedias.org>
- “Surkov turned Russian politics into a bewildering constantly changing piece of theater. He sponsored all kinds of groups, ...no one was sure what was real or fake. ...it is a strategy of power that keeps any opposition constantly confused.”

How 11 is 10:

Jewish Tradition:

- The first commandment is often considered to be “I am the Lord thy God,” which is seen as a foundational statement of faith rather than a “command” in the imperative sense.
- The prohibition against idolatry (“No other gods before me” and “No graven images or likenesses”) is typically grouped as a single commandment.

Catholic and Lutheran Traditions:

- Combine “No other gods before me” and “No graven images or likenesses” into one commandment.
- Split the prohibition against coveting into two separate commandments: one about coveting a neighbor’s wife and another about coveting a neighbor’s goods.

Protestant Traditions (Reformed and Evangelical):

- Typically separate “No other gods before me” and “No graven images or likenesses” as two distinct commandments.
- Combine the coveting prohibitions into a single commandment.

The American Dream = Rags to Riches

- The story that anyone can become King or Queen.
- Story of individual, not the collective.
- But we know about fame and success:
The presence of outsized fame in a social system means social imitation is a driver of value.
- Stories of societies can only hold if they have been and remain believable.
- “Entertaining beliefs in economic mobility”: Effort to understand if rags to riches stories in popular culture affect people’s lives. ^[14]

If not Trump, what? David Brooks, New York Times, 2016-04-29:

“We’ll probably need a new national story. Up until now, America’s story has been some version of the rags-to-riches story, the lone individual who rises from the bottom through pluck and work. But that story isn’t working for people anymore, especially for people who think the system is rigged.”

“I don’t know what the new national story will be, but maybe it will be less individualistic and more redemptive. Maybe it will be a story about communities that heal those who suffer from addiction, broken homes, trauma, prison and loss, a story of those who triumph over the isolation, social instability and dislocation so common today.”

Rules of Story:

	Gun	Cat	Razor	Law
Checkov's	If a gun is introduced in the first act, it must be fired by the third.	If a box is introduced in the first act, a cat must sit in it by the third	The simplest way to fire a gun is to pull the trigger	Every gun in a play will be fired
Schrodinger's	You can't know if a gun is loaded, or not, until the trigger is pulled	An unopened box may contain a dead cat, or an alive one, and you won't know until you open it	An unopened box may contain the solution to your problems	You can't know that things will go wrong, until they do
Occam's	The simplest way to kill off a character is to shoot them	If you hear a strange noise at night, it's probably a cat	The simplest explanation is probably the correct one	Everything that can be explained, will be explained
Murphy's	Any gun that can go off, will go off	Any box that can contain a cat, will contain a cat	Anything that can be simple, will be simple	Anything that can go wrong, will go wrong

This is a bit of fun with bonus misspellings and only minor rage inducement.

Stories are algorithms for life:

Homo narrativus:

- 🌀 Provide dynamic paths and trajectories.
- 🌀 If this, then that.
- 🌀 Convey and reinforce how to behave, how not to behave.
- 🌀 Full ecology of stories =
Competing, self-defending operating system for people's minds.

Proverbs as algorithms (hero: Wolfgang Mieder

- 🧵 “Pride cometh before the fall.”
- 🧵 “A stitch in time saves nine.”
- 🧵 “Look before you leap.”
- 🧵 “Anti-aphorism: The one who hesitates is lost.”
- 🧵 Understanding randomness: “Shit happens”

The boiled-down essence of stories:

The three fundamental events of (non-clone) life:

- Hatchings, Matchings, and Dispatchings.
- Stories encode survival algorithms.
- Survival algorithms for individuals and groups.
- Dynamic paths: the true, the possible, the unlikely.
- The unifying theme of existence is existence.

Emotional arcs are not plots. Temporal character interaction networks are closer but still miss events, environments, interaction types:

“George Green and physics”
Freeman Dyson,
Physics World, 6, 33, 1993. ^[10]

- “... scientific revolutions are more often driven by new tools than by new concepts.
- Thomas Kuhn in his famous book, The Structure of Scientific Revolutions, talked almost exclusively about concepts and hardly at all about tools. His idea of a scientific revolution is based on a single example, the revolution in the theoretical physics that occurred in the 1920s with the advent of quantum mechanics.
- This was a prime example of a concept-driven revolution. Kuhn’s book was so brilliantly written that it became an instant classic. It misled a whole generation of students and historians of science into believing that all scientific revolutions are concept-driven.”

“Plotted: A Literary Atlas”
by Andrew DeGraff (2015). ^[9]

<http://www.andrewdegraff.com/moviemaps/>

“George Green and physics”
Freeman Dyson,
Physics World, 6, 33, 1993. ^[10]

- “The concept-driven revolutions are the ones that attract the most attention and have the greatest impact on the public awareness of science, but in fact they are comparatively rare.
- In the last five hundred years we have had six major concept-driven revolutions, associated with the names of Copernicus, Newton, Darwin, Maxwell, Einstein and Freud, besides the quantum-mechanical revolution that Kuhn took as his model.
- During the same period there have been about 20 tool-driven revolutions, not so impressive to the general public but of equal importance to the progress of science.”

- Used by Reagan and Bush in 1980.
- Template used by many others including Bill Clinton.

A Science of Stories?

- Stories are everything⁵
- Maybe? yes?
 - Stories ~ Characters* + Time.
 - One of the most important, dangerous, enjoyable terrifying things we can study.
 - Essence: Bare survival to flourishing (“Danger Will Robinson”)

We talk about and study stories everywhere but ...

- We don’t have a central place academically.
- Departments of: English, history, political science, folklore, cognitive sciences, arts, musicology, communication, ...

We’re we are now:

- SOCKS: Science of Online Corpora, Knowledge, and Stories (\$20M, 2023–)

⁵ Okay, poems are everything

“George Green and physics”
Freeman Dyson,
Physics World, 6, 33, 1993. ^[10]

- “I will not attempt to make a complete list of tool-driven revolutions. Two prime examples are the Galilean revolution resulting from the use of the telescope in astronomy, and the Crick-Watson revolution resulting from the use of X-ray diffraction to determine the structure of big molecules in biology.
- The effect of a concept-driven revolution is to explain old things in new ways.
- The effect of a tool-driven revolution is to discover new things that have to be explained.”
