Whimsical but great example of real science:

“How Cats Lap: Water Uptake by *Felis catus*” (田)

Reis et al., *Science*, 2010.

A Study of Cat Lapping

Adult cats and dogs are unable to create suction in their mouths and must use their tongues to drink. A dog will scoop up liquid with the back of its tongue, but a cat will only touch the surface with the smooth tip of its tongue and pull a column of liquid into its mouth.

People who draw letters so others can read them tend to:

- ▶ be high 'self-monitors'
- ▶ be concerned with how others see them
- ▶ adapt better to social situations
- ▶ skilled at altering how others see them
- ▶ be more adept at lying...

People how draw letters so they can read them tend to:

- ▶ be low 'self-monitors'
- ▶ follow their inner values
- ▶ remain the same across social settings
- ▶ be less adept at lying...
